Lahore, Punjab 53700, Pakistan | +92 333 6861392 | shakir201650@gmail.com | [LinkedIn: shakir-ullah-201650](#)

Professional Summary

Results-driven Senior Software Engineer with 7+ years of experience architecting, developing, and scaling cloud-native, enterprise-grade web applications. Skilled in React.js, Node.js, and TypeScript, with expertise in building **microservices architectures**, **continuous integration/continuous deployment (CI/CD) pipelines**, and **software-as-a-service (SaaS) platforms**. Proven track record of improving application performance, enhancing user engagement, and delivering secure, scalable solutions across financial technology (FinTech), digital banking, and enterprise SaaS systems. Adept at collaborating with global cross-functional teams to drive innovation, efficiency, and long-term maintainability.

Education

Bachelor of Computer Science 15/09/2014 to 25/05/2018

NAMAL University, Mianwali, Punjab

GPA: 4.0/4.0

- Awarded **Dean's Honor Award** for academic excellence.
- Active member of **Namal Society for Social Impact**, contributing to community initiatives.

Technical Expertise

- **Frontend Development:** React.js, Redux, HTML5, CSS3, SCSS, Tailwind CSS
- **Backend Development:** Node.js, Express.js, REST API
- **Programming Languages:** JavaScript (ES6+), TypeScript
- **Tools & Platforms:** Git, AWS, Jira
- **Methodologies:** Agile, Scrum, Continuous Integration / Continuous Deployment (CI/CD)

Professional Experience

Senior Software Engineer – React 22/07/2024 to Present

RAKBANK, Dubai, United Arab Emirates

- Led development of scalable front-end components using React.js, Next.js, Redux, and Material UI, improving page load time by 20%.

- Implemented reusable design patterns and optimised architecture, reducing maintenance overhead by 30%.
- Collaborated with cross-functional teams to deliver digital banking solutions serving 100K+ users.
- Facilitated peer code reviews across a team of 10+ engineers, ensuring consistent coding standards and fostering a high-quality engineering culture.

Senior Software Engineer – JavaScript 01/03/2022 to Present

Digitify, Lahore, Pakistan

- Engineered high-performance, responsive UI features with React.js, TypeScript, Redux, and Material UI, improving load speed by **30%** and enhancing customer engagement across FinTech platforms.
- Developed and maintained RESTful APIs and middleware services in Node.js, reducing data transfer latency by **25%** and ensuring seamless, secure data flow across distributed systems.
- Conducted unit testing with Jest, achieving **85%+** test coverage and reducing production regressions by **20%**, significantly improving platform reliability.
- Boosted sprint velocity by **25%** through effective Agile practices and code quality initiatives.
- Led structured code reviews and best practice sessions, mentoring junior developers and raising overall code quality standards, resulting in a **30%** reduction in rework.

Full Stack Developer (JavaScript) 25/11/2020 to 30/02/2022

Digitify, Lahore, Pakistan

- Delivered end-to-end features with React.js (frontend) and Node.js (backend), reducing feature rollout time by **25%** and supporting seamless cross-platform functionality.
- Integrated third-party services, authentication mechanisms, and secure APIs, enhancing platform security and reliably managing **10K+** requests daily without downtime.
- Championed TypeScript adoption and reusable component libraries across **3+** development teams, improving maintainability and reducing code duplication by **30%**.

Associate Consultant 01/07/2018 to 20/09/2020

Technologies, Lahore, Pakistan

Speridian

- Developed client-side applications and complex business logic for enterprise-scale software, improving system performance and supporting **10K+** daily users.
- Collaborated across the full software development lifecycle (SDLC)—from requirement analysis to QA and delivery—ensuring **95%** on-time project completion.
- Partnered with clients during requirement gathering and solution design, increasing customer satisfaction scores by **15%** through tailored solutions.

Trainee Consultant 01/06/2018 to 31/06/2018
Speridian Technologies, Lahore, Pakistan

- Completed intensive training in full-stack JavaScript development (React.js, Node.js, Express.js, MySQL), building **3+** capstone projects to demonstrate end-to-end application delivery.
- Participated in structured mentorship programs focused on enterprise system design and best practices, accelerating readiness to contribute to enterprise-scale client projects.

Projects

CLM - Customer Lifecycle Management (Onboarding Platform) | RAKBANK | 09/2024 to Present

- Built key features of a digital onboarding platform for retail and corporate customers using **React.js, TypeScript, Material UI, and Atomic Design**.
- Implemented **maker-checker workflows, role-based access control, and reusable UI components**, improving compliance and reducing manual processing time.

Tech Stack: React.js, TypeScript, Material UI

Custom Design System (React + Material UI) | RAKBANK | 08/2024 to Present

- Developed a centralized design system aligned with **Atomic Design principles**, delivering reusable UI components for multiple projects.
- Reduced frontend development time and improved UI consistency across banking applications.

Tech Stack: React.js, TypeScript, Material UI

Web Sales Solution (Multi-Tenant) | Digitify | 02/2022 to Present

- Architected a multi-tenant sales platform in **React.js + Node.js**, supporting multiple newspaper brands with dynamic theming and configuration.
- Enabled faster rollout of brand-specific portals, reducing time-to-market and improving maintainability.

Tech Stack: React.js, TypeScript, Node.js, Material UI, AWS (S3, SES), MySQL

CIM & ACM (Aria Media & Publishing Suite) | Digitify | 09/2020 – 02/2022

- Built modules for **Customer Interaction Management and Application Configuration**.
- Delivered secure **role-based access, automation, and real-time customer management**, streamlining operations for the contact center.

Tech Stack: React.js, TypeScript, Node.js, Material UI, AWS (S3, SES), MySQL

GoBig AI-Powered Blog Platform | Independent Project | 2023

- Created a **full-stack AI-powered blog generator** with **Next.js, Node.js, OpenAI, DeepSeek, SerpApi, and Leonardo.ai**.
- Dynamically generates country-specific blogs with AI content + visuals, improving SEO and user engagement.

Other Projects (Earlier Work)

- **DeepReef (FinTech Platform):** React.js + LoopbackJS investment dashboard for tracking portfolios.
- **Globuss (Inventory Platform):** Multi-tenant real-time stock management system using React.js + Node.js.
- **MOARSS (Meeting Management System):** Secure, role-based meeting lifecycle management tool.
- **SIMS (Sensor Inspection Management):** A multi-tenant inspection automation platform featuring a scheduling engine.
- **GoBig Merchant & Storefront Apps:** Multi-merchant food delivery ecosystem with order tracking and analytics.

Achievements

- Basic Security Awareness (HTML5) – Aria Systems
- Certificate of English Ability, Emmersion
- Dean's Honor Award, NAMAL University
- Employee of the Month, Speridian Technologies
- OWASP Top 10 Web Application Vulnerabilities Course – Aria Systems
- Privacy and Data Protection (2018) – Aria Systems
- Top Contributor Award, Digitify
